

THE KIOSK EVERY C-STORE NEEDS

The cash and ticket redemption center built for your store. A full-service ATM, Bill Break, Cash Advance, ticket redemption, Cash to Card, and a staff Business Center in one compact unit, installed and supported for you.

MORE REVENUE. LESS HASSLE.

CASH ACCESS AND GAMING REDEMPTION, RIGHT ON YOUR FLOOR

The MultiFunction Kiosk is a powerful, all-in-one unit that brings essential financial services, cash solutions, and gaming redemption tools directly into your store. It securely handles every cash transaction on-site, cutting fraud, theft, and staff cash exposure, while keeping your cash-paying customers engaged, spending, and coming back.

It is a kiosk first. ATM access is one of six self-service functions in one compact, high-performance unit, installed right where your customers are.

KEY HIGHLIGHTS

- ✓ Installed and supported for you. No branding or setup work on your end.
- ✓ Standalone operation or full cloud-based fleet management.
- ✓ Real-time monitoring, alerts, and remote diagnostics.

ALSO BUILT FOR C-STORES WITH SKILL-BASED GAMING TERMINALS

Any store with skill-based gaming terminals can drive additional revenue and foot traffic with the MultiFunction Kiosk. Seamless integration with Pyramid, Axes AI, and EasyLinx lets players redeem tickets instantly and convert winnings into cash, digital gift cards, or prepaid debit cards on the spot.

SIX SERVICES. ONE FOOTPRINT.

Powerful features. Real-life solutions for your store.

ATM

Secure withdrawals and balance inquiries, 24/7, with Rollover when a guest hits their daily limit.

BILL BREAK

Large bills exchanged for custom mixes of \$20s, \$10s, \$5s, and \$1s, tracked by denomination.

CASH ADVANCE

PIN debit when ATM limits run out, with full fee disclosure before every transaction.

TICKET IN, TICKET OUT

Buy tickets, redeem winnings, and choose a payout: cash, digital gift card, or virtual Visa® / Mastercard®.

CASH TO CARD

Cash in, prepaid Mastercard® out. Physical or virtual, with no bank account required.

BUSINESS CENTER

Staff-only store deposits, till-float bill change, and register funding with employee ID audit logs.

01 ATM FUNCTIONALITY

Give customers instant cash access with a full-service ATM built into the kiosk: secure withdrawals and balance inquiries, 24/7. When a guest hits their daily limit, the Rollover feature offers a PIN debit option with a separate limit to keep the transaction moving.

WHAT IT DOES FOR YOUR STORE

- ✓ Drives consistent foot traffic and in-store spending
- ✓ Generates reliable surcharge revenue
- ✓ Cuts staff involvement in cash requests

02 BILL BREAK

Customers feed large bills into the secure bill acceptor for instant exchange into smaller denominations, with fully customizable mixes of \$20s, \$10s, \$5s, and \$1s. The system tracks every bill inserted and dispensed, by denomination and cassette.

- ✓ Ideal for skill games, tipping, and vending machines
- ✓ Eliminates “can you break a \$100?” at the register
- ✓ Captive audience for kiosk ads and upsell

CHANGE FOR YOUR CUSTOMERS... AND YOUR TILL.

Bill Break works for your cashiers too. When the register has only large bills, staff go from the till to the kiosk and back in moments, instead of waiting for a manager to bring change up from the back. The customer gets exactly what they need.

03 CASH ADVANCE

When standard ATM limits run out, Cash Advance keeps your customers funded via PIN debit. In Cash Mode, the kiosk dispenses funds as soon as the card and PIN are entered. In Ticket Mode, it prints a redeemable ticket and verifies the customer's ID by mobile, which keeps regulated locations compliant. Either way, customers pick from quick amounts and see every fee before they confirm.

- ✓ Keeps customers funded and spending longer
- ✓ Reduces staff-handled cash advances
- ✓ Recurring revenue
- ✓ Cash advance when limits are met
- ✓ Compliance-ready Ticket Mode for regulated locations

04 TITO: TICKET IN, TICKET OUT

A complete gaming ticket ecosystem: players buy tickets, redeem winnings, and choose their payout, in cash, digital gift card, or virtual Visa® / Mastercard®, all from the kiosk. With instant ticket validation, full or partial redemptions, and card-conversion options that generate significantly higher margins than cash-only payouts, the kiosk handles every redemption without pulling in your staff.

- ✓ More traffic and spend from cash-carrying customers who stay longer
- ✓ Less staff work: no manual ticket handling
- ✓ Lower risk with secure validation and tracking
- ✓ Better customer experience: fast, flexible payouts

CASH MODE. TICKET MODE.

Two ways to pay out a cash advance, so the kiosk fits the rules where you operate.

05 CASH TO CARD

Customers insert cash at the kiosk and instantly receive a physical or virtual general-purpose prepaid Mastercard®, accepted anywhere Mastercard is accepted.

- ✓ Perfect for cashless and card-only locations
- ✓ No bank account required

STAFF-ONLY CASH MANAGEMENT

06 BUSINESS CENTER

Staff-exclusive cash management tools, built into the same kiosk your customers use. Deposits, till change, and register funding happen on the floor, with an audit trail behind every one.

STORE DEPOSIT

Secure, automated deposits with validation, counting, next-day credit, and full audit trails.

- ✓ Eliminates the need for expensive separate safe-deposit machines
- ✓ Employee ID audit logging on every transaction

STORE BILL CHANGE

Quick bill change for optimized till denominations.

- ✓ Speeds up secure end-of-shift cash drops
- ✓ Reduces cash-handling risk, theft, and labor costs

CASH REGISTER FUNDING

On-demand funding cuts back-office trips during peak hours.

- ✓ Maintains perfect till floats at the start of every shift

PAYMENT SOLUTIONS FIRST. ATM FUNCTIONS INCLUDED.

The MultiFunction Kiosk is a payment and cash-management solution for your store that happens to have ATM functions, not an ATM with extras.

BUILT FOR YOUR STORE

IDEAL FOR

- Gas station c-stores with skill-based gaming terminals
- Route-operated gaming locations
- Gaming lounges and entertainment centers

KEY BENEFITS

- Full TITO: Pyramid, Axes AI, EasyLinx
- Bill Break for skill-game denomination needs
- Digital card conversion increases your margin
- ATM drives additional in-store spending
- Reduces staff involvement in redemptions

FLEXIBLE FLOWS FOR EVERY PLAYER

Whether buying tickets or redeeming winnings, your customers get a simple, intuitive self-service experience, start to finish.

PLAYER BENEFITS

- Fast ticket purchase
- Quick redemption process
- Multiple payout choices
- Reduced waiting times
- Easy-to-use touchscreen experience

COMPLIANCE & SECURITY

- Secure transaction processing
- Complete audit trails
- Real-time reporting
- KYC support where required
- Centralized monitoring and controls

**YOUR STORE.
YOUR REVENUE.**

Reliable surcharge revenue, per-transaction fees on cash advances, and higher margins on card payouts than cash-only redemptions, all from one unit installed right where your customers are.

MORE REVENUE. LESS HASSLE.

- ✓ 24/7 self-service
- ✓ Drives up revenue
- ✓ Customer loyalty
- ✓ Revenue generation
- ✓ Mini financial hub
- ✓ Fully serviced and supported
- ✓ Increased average transaction value
- ✓ Enhanced security and compliance
- ✓ Drive foot traffic
- ✓ Reduced operational costs
- ✓ Centralized management
