QUESTIONS, ANSWERED

How do you keep my ATMs secure?

With Watchdog. A manufacturer-approved cellular modem puts each terminal on a private, managed network, in a hardened environment that blocks tampering, unauthorized access, and man-in-the-middle attacks.

Do you work with high-risk businesses?

Yes. Whether you are a low-risk retailer or a high-risk merchant, we have the right payment solution.

Do I have to watch the machines myself?

No. Watchdog monitoring is fully managed. Faults are found and fixed remotely, often before you would have noticed, and live cash levels with low-cash alerts tell you when to restock.

What kind of support do I get?

A real team ready to help you, not just a call center, focused on long-lasting relationships and personalized support.

At Clear Choice, we believe payments shouldn't hold you back. They should push you forward. With us, you get more than a vendor. You get a partner committed to your success.
